

2100L Pump Chamber

SKU: PC2100-V

Ideal situation:

- Whole house sewage pump chamber for up to a 6 bedroom house
- Where the pipe invert is very deep
- Large stormwater applications

The 2100L pump chamber is ideal for large whole house domestic installations, and consists of a high-quality polyethylene tank ideal for collecting rainwater, greywater and/or black wastewater. These chambers are certified and can be consented through council, if needed. The chamber can be completely buried, if needed, and 300mm lid risers are also available.

The pump installed inside the tank, is a 50mm stainless steel, industrially rated vortex pump that allows the sewage to be sent to the sewer or storage tank, depending on the application.

A high-level alarm is also installed, and this will give an early warning of any pump problem.

Chamber dimensions: 1330mm in diameter x 1700mm high

Pump Specs: 0.75kW, 4.8 amps, 7.8m max head, 400L/min max flow

Optimal pumping range: 200L/min @ 5m head
