

30L Pump Sump

SKU: PC30-V

Ideal situation:

- Where stormwater is needed to be pumped from inside an existing building
- Small stormwater pumping applications or sealed driveways

The 30L pump chamber consists of a high quality polyethylene sump and grate and is ideal for collecting rainwater in small domestic installations.

The pump installed inside the tank, is a vortex pump and allows the water to be sent to the kerb or storage tank, depending on the application.

Gravel needs to be kept out of the sump to prevent pump or pipe blockages.

Chamber dimensions: 350mm L x 350mm W x 460mm H

Pump Specs: 0.37kW, 3.6 amps, 7m max head, 150L/min max flow

Optimal pumping range: 120L/min @ 4m head
